PROFESSIONAL SUMMARY

Technology Engineer at Infozillion Teletech BD Ltd with a Computer Science and Engineering background. Experienced in telecom technology operations and backend development using Python and Django. Certified in NSDA Level-4 Web Application Development with Python from DIPTI. Developed web applications including a Job Portal, Quiz Portal, and Portfolio Website, and author of a conference paper accepted at QPAIN 2026.

SKILLS AND EXPERTISE

Programming & Development

Python (Django) | JavaScript | C (Basic) | HTML | CSS | Tailwind | Bootstarp

Tools & Technologies

Git | Linux OS | Windows Server 2019 | Microsoft Office | Canva

AI & Modern Skills

Prompt Engineering | Vibe Coding

Research & AI Expertise

LLM (Large Language Models) | Artificial Intelligence (AI) | Machine Learning (ML) | Deep Learning | Explainable AI (XAI)

Business & Management

Business Development | Strategic Planning | Leadership | Team Management | Communication

PROFESSIONAL EXPERIENCE

Engineer, Technology – Infozillion Teletech BD Ltd | Technical Department

2026- Present

- Work with the technical team supporting telecom technology operations
- Assist in system monitoring, troubleshooting, and service maintenance
- Collaborate with engineers to maintain operational service platforms

Assistant Coordinator, Business Development – Connectiya

August 2024 - 2026

- Led operational workflows for internship partnership programs
- Coordinated recruitment processes with partner organizations
- Supported planning and execution of collaboration initiatives

EDUCATION

Bachelor of Computer Science and Engineering

Jan 2022 - 2025 Dec

World University of Bangladesh

- CGPA: 3.65 / 4.0

Higher Secondary Certificate (Science)

2020

Milestone College, Dhaka

- Result: 4.75 / 5.0
-

CERTIFICATIONS

Web Application Development with Python (Level 4) – National Skills Development Authority (NSDA)

2026

- Completed government-certified training in Python-based web application development with a focus on Django backend development
 - Developed backend systems using Django, including API design and database integration
 - Gained practical experience in system design, deployment concepts, and real-world project implementation
-

PROJECTS

E-commerce Platform – Joss Deals BD (Django)

- Built a full-featured backend using Python & Django with authentication and CRUD operations
Managed products, orders, and user data efficiently

Job Portal System (Django)

- Developed a complete job management system with posting, editing, and candidate shortlisting
Implemented skill-based matching and dynamic candidate profiles

E-commerce Platform – TiqBud (AI-assisted)

- Developed the platform using AI-assisted workflows to streamline development
Implemented product display features and core user functionalities

Quiz Portal

- Built an interactive quiz system with user authentication and result tracking

Portfolio Website

- Developed a responsive personal portfolio website to showcase projects and skills

LEADERSHIP & CAMPUS ENGAGEMENT

President – WUB Computer Society

July 2024 - July 2025

- Organized the “Battle of Coders” competition, achieving a 60% increase in participation.
- Coordinated with organizing authorities to support the successful arrangement of a tech fest, managing a cross-functional team of 30+ members across design, event, and development.
- Led digital content planning and execution, creating promotional and educational materials.

Secretary of Public Relations – WUB Robotics Club

2023-2024

- Executed outreach programs that significantly improved club visibility.
- Handled sponsorships and external communications for robotics events.

Deputy Head of Operations and Management – WUB Hult Prize

2022-2023

- Coordinated logistics, judge communication, and event execution.
- Contributed to seamless participant engagement and backend operations.

RESEARCH & PUBLICATIONS

- Explainable Artificial Intelligence (XAI) for Early Diabetes Prediction: A Lightweight XGBoost Model with SHAP (XAI, XGBoost, SHAP, Healthcare AI)
Accepted at QPAIN 2026 (IEEE Conference)
- A Global Scoping Review of Traditional, Digital, and AI-Driven Interventions in Healthcare Referral Systems: Comparative Insights from Low-, Middle-, and High-Income Countries (Healthcare Systems, AI in Healthcare, Digital Health) - Journal Paper (Under Review)
- Design and Evaluation of an Explainable GP-Centric Clinical Decision Support System for Healthcare Referral in Bangladesh (XAI, Clinical Decision Support System, Healthcare AI)
Currently in final formatting and write-up stage for journal submission
- Rice Leaf Disease Detection using MobileNetV2 with Hybrid Attention (Deep Learning, MobileNetV2, Computer Vision)
Currently in final formatting and preparation stage for conference submission
